

ShockWatch selection guide

ShockWatch is available in five different colours with various sensitivities (G-values):

Green: 100G	Orange: 75G	Red: 50G	Purple: 37G	Yellow: 25G
------------------------------	------------------------------	---------------------------	------------------------------	------------------------------

Activation (the colour changes from clear into red) indicates an impact beyond the indicator sensitivity level.

FIND THE CORRECT COLOUR FOR YOUR DISPATCH

Which colour of ShockWave to choose depends on the weight and size of your dispatch. A big dispatch needs a ShockWave with small G-value, a small dispatch needs one with high G-value.

In the table below the weight and size of the dispatch is combined to identify the correct ShockWatch indicator:

➔	$0 < m^3 \leq 0.03$	$0.03 < m^3 \leq 0.135$	$0.135 < m^3 \leq 0.4$	$0.4 < m^3 \leq 1.35$	$1.35 < m^3$
$0 < kg \leq 4.5$	GREEN	GREEN	ORANGE	ORANGE	RED
$4.5 < kg \leq 11.25$	GREEN	ORANGE	ORANGE	RED	RED
$11.25 < kg \leq 22.5$	ORANGE	ORANGE	RED	RED	PURPLE
$22.5 < kg \leq 45$	ORANGE	RED	RED	PURPLE	PURPLE
$45 < kg \leq 112$	RED	RED	PURPLE	PURPLE	YELLOW
$112 < kg \leq 450$	RED	PURPLE	PURPLE	YELLOW	YELLOW
$450 < kg$	N.A.	PURPLE	YELLOW	YELLOW	YELLOW
